SUMMARY

Full stack web developer leveraging a fine arts background to build a cleaner and more intuitive user experience on the web. Currently undergoing a bootcamp program to earn a certificate in full stack development from the University of New Hampshire, currently developing skills in Javascript, CSS, MERN stack, as well as responsive web design. Well known as a communicative team player passionate about continuous learning and application development.

TECHNICAL SKILLS

Languages: HTML, CSS, Javascript
Frameworks/Libraries: Bootstrap, Bulma, jQuery, Node.JS, Angular, MongoDB

PROJECTS

Easy Recipeazy
[Code](#)
[Deployed Application](#)

- An application that selects and displays a dinner and drink recipe based on a user's input (choice preference of ingredients, drinks). Alternatively the app will show dinner and drink recipes completely randomly (if the user does not select any preferences).
- Responsible for general organization of the group as well as managing the repository. Assisted in general design template, as well as confirming functionality across different workspaces and devices. Managed main project repository and assisted in debugging as well as testing.
- Git/GitHub, Bulma CSS framework, jQuery, TheMealDB, TheCocktailDB, Postman, Owl

Key Accomplishments:
Tech Transport Employee of the Year, 2018

EDUCATION

Bootcamp Certificate: University of New Hampshire, Portsmouth, NH

Currently enrolled in UNH's 24 week web development bootcamp. Learning full stack web development skills such as Git, HTML5, CSS, Javascript, JQuery, Node, and other modern frameworks.

Bachelors of Fine Art: New Hampshire Institute of Art

Learned skills in basic web design, and graphic design skills in Adobe Illustrator, as well as Adobe InDesign. Refined skills in Adobe Photoshop, as well as Lightroom. Explored different photographic printing methods, as well as experimental photography techniques. Learned some basic psychology in regards to how to keep, or re-direct a viewer's attention to where you would like their 'eye' to land.

EXPERIENCE

LTL Customer Service   2017-Present
Tech Transport   Milford, NH
As a member of the less than truckload side of the operations, daily tasks are very similar to the truckload side of the operations team. Differences include assisting the Logistics department in sourcing contract-carrier rates in a timely fashion to ensure delivery and pick up goals are met. Other tasks include working closely with common carriers to ensure timely pickups and deliveries, as well as escalating claims as needed. Additional duties include assisting customers, and the administration team in the claims process for lost or damaged freight, and gathering shipping documents to ensure timely payments for customers and carriers.

TL Customer Service   2017-Present
Tech Transport   Milford, NH
As a member of the truckload side of the operations team, I act as the liaison between customers and carriers to efficiently move freight through various lanes across the continental US, as well as Canada and Mexico. Daily tasks include providing status updates, assisting customers in choosing the most cost efficient way to move freight, safeguarding shipments and ensuring that ETA expectations are met while adhering to industry standards, and providing exceptional customer service.
